BIONIC INSTRUMENTS

## It's time for you to do something for yourself. **The memon philosophy.**

For some time now, there has been an ongoing debate whether and to what extent negative environmental influences, such as electrosmog, geopathic fields of interference and contaminated water, are harmful and have a negative influence on our quality of life. People even argue whether electrosmog or earth radiation even exist and what the terms actually mean. We are familiar with similar debates from the past concerning issues such as asbestos, formaldehyde, acupuncture, homeopathy and tobacco. Remember those days?

We believe that these hazards, currently only recognized by a small portion of conventional science, are very likely to be harmful to our health. We also believe that subtle energetic influences such as resonance, polarity and information play an important role in our quality of life.

As with quantum physics, we also conclude that information is an essential building block for our lives and that we are surrounded by a field of information. In contrast to the position the majority of modern conventional science still maintains, we believe that artificial electromagnetic waves carry information that can change the quality of information that our bodies experience, thereby creating pathogenic information that can cause various illnesses. This has a negative effect on our health and well-being.

Therefore, from our point of view, it is essential to protect ourselves against these omnipresent influences in order to benefit from using modern technology unaffected and to maintain our health and well-being.

The memon technology provides a solution that offers comprehensive protection directly in our immediate environment.

memonizers neutralize the negative and weakening effects caused by electrosmog, thereby alleviating cell stress and improving our quality of life.

memonizers protect against the negative impacts of geopathic fields of interference, such as underground water veins, etc. For better rest and regeneration.

memonizers renaturalize tap water, providing increased benefits from natural water quality that is free of harmful information. Water that cleanses, purifies and supports vitality.

memonizers optimize indoor climates by reducing fine particulate matter in the air that can penetrate deep into the lungs, which means less contamination in the air. Breathe deeply, freely and benefit from cleaner air.

memonizers have been developed and are designed for use in the most important areas of our lives: at home, at work, in the car and while traveling, or when using modern communications technology.

Our views are based on insights that we have gained over the course of nearly two decades of experience, intensive research and development. The contents of this brochure are based on those beliefs.

We hope that our knowledge is able to provide you with the benefits and advantages for a higher quality of life.

BIONIC INSTRUMENTS

# Made in Germany, at home in the world. The memon company.

## **Founded on principle.**

Erika and Hans Felder founded the company memon in 2002. It was their absolute conviction that gave them the courage to make this decision. Prior to founding memon, the couple had run a successful real estate and property development business for thirty years that became one of the leading companies in the region. Their research for natural and eco-friendly construction components and their own health-related experiences were driving forces in the arrangement of the first meeting between the couple and Winfried M. Dochow, the inventor and developer of memon technology.

## **Developed with enthusiasm and conviction.**

They were fascinated by these findings and by the effects of this technology, which they experienced for themselves. Their goal was to bring this same enthusiasm and enrichment to as many people as possible in order to improve their quality of life, as well as those of the employees, scientists, physicians and experts who are actively involved with memon. The memon products impress with their efficacy, quality, design and ease of use. Made for one specific purpose: Renature Your Life.

The many thousands of people who use memonizers at home, at the office, in hotels and while traveling are true testament to this goal. The same can be said about the numerous references in top hotels, retail chains, concert halls, the Austrian ski team or even various awards.

Start changing your own environment and your own quality of life today! You do not need to accept negative environmental influences. Make a change today. Now. With wholehearted conviction.

*“memon is committed to creating a balanced, sustainable world and stands for people who act on their own responsibility and in harmony with nature.”*

# One advantage is good. **Seven advantages are better.**

## **memonizers neutralize negative environmental influences.**

They neutralize the negative influences of harmful information from electromagnetic fields, geopathic fields of interference and harmful substances in water – all of which can negatively affect our health. They also help reduce the amount of fine particulate matter in indoor environments.

## **memonizers function naturally.**

They are based on natural principles, not electrical, chemical or magnetic processes that could also have negative effects.

## **memonizers function holistically.**

They have been developed to create a harmonized living environment: at home, at the office, on the move, in commercial premises and in public spaces. The extensive memon portfolio covers a wide range of uses. Comprehensive effects mean an overall better quality of your life.

## **memonizers are based on the latest research.**

The foundations are pioneering discoveries from the fields of quantum and bio-physics. memonizers restore a natural environment that is free from pathogenic, i.e. illness-causing, influences.

## **The effects of memonizers have been confirmed through practical testing.**

Growing numbers of researchers are focusing their attention on memon technology. They have tested the memonizers in various studies and confirmed their positive effect on living organisms. Just ask the many thousands of inspired people who are already using memon products.

## **memonizers are exciting customers worldwide.**

From our small town and into the world, memonizers are produced in Germany and have been used all around the globe for more nearly two decades and support their users in many areas of their daily lives.

## **memonizers are user-friendly.**

They are easy to use and can be installed with little effort into the existing electric or water supply system, or even attached to a mobile phone. Easy and effective.

# The natural light spectrum. The foundation of all life.

The visible light spectrum is only a small part of the entire frequency spectrum. Life has only been able to evolve and sustain itself on our planet because of this part of the spectrum. Frequencies outside the visible spectrum have a negative influence on our daily lives and all of our organic functions. This applies to all technical forms of radiation, such as radio waves, microwaves, radar, as well as nuclear rays and x-ray radiation.

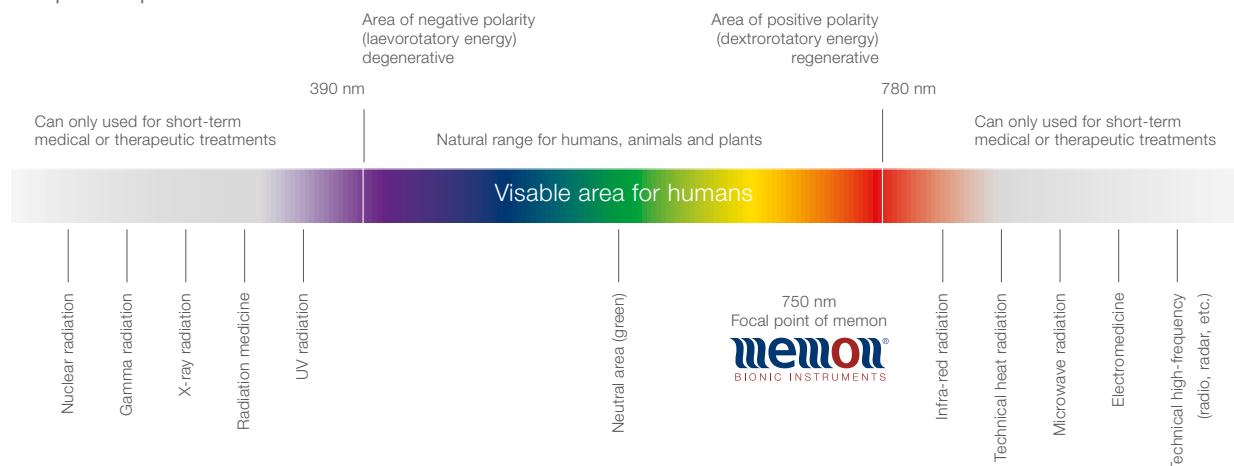

The memon technology encompasses the spectrum of natural sunlight, focalizing on the frequency of 750 nm (dextrorotatory range). This produces a natural state in our everyday environment that explains the vitalizing and renaturalizing effect of the memon technology.

The dextrorotatory range begins in the center of the light spectrum, starting in the green range and extending to the right up to 780 nm. Nature dictates that dextrorotatory energy is dominant; representing positive movement, activity and regeneration.

“Where there is illness, the laevorotatory, or degenerative energy, prevails,” states memon developer Winfried M. Dochow. He concluded that his cancer was based on laevorotatory information that was out of harmony with his environment. More importantly, he also came to the conclusion that non-material, dextrorotatory energy is crucial for our health.

We only need to follow nature’s example for natural health.

Having enough time, rest and a natural living environment **are most important in life.**

# RENATURE YOUR LIFE

*“I focused on one question: what can we do to counteract the depletion of our energy caused by an excess of pathogenic radiation? The idea was as simple as it was brilliant: the pathogenic information needs to be eliminated or neutralised. This is achieved by using destructive interference and the understanding of regenerative dextro-polarity.”*

Winfried M. Dochow, Developer of memon Technology

**memon**<sup>®</sup>  
BIONIC INSTRUMENTS

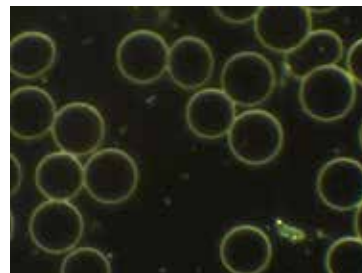

## Risks become visible. And with memon dispensable.

### **Dark field microscopy using live blood under the influence of mobile phone radiation.**

Sample pictures from a before and after test.

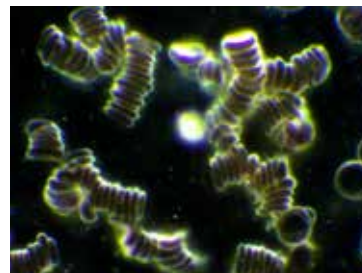

Before exposure:

The red blood cells flow freely throughout the body. They are able to effortlessly carry out their role of transporting oxygen to the cells.

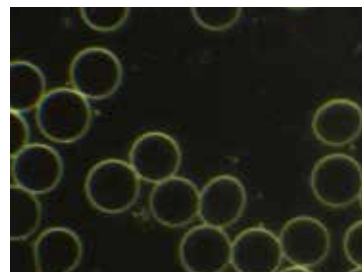

Blood picture after 10-minute exposure:

The blood cells clump together (known as the rouleaux effect) and restrict blood circulation and the transportation of oxygen. It is clear that blood cells are negatively affected.

Blood picture after 10-minute exposure with the memonizerMOBILE:

The rouleaux formations do not appear and circulation is not negatively affected.

The official school of thought currently does not yet recognize methods of measurement such as this, which clearly creates the same results that can be reproduced. Recognition of these types of results are only slowly taking hold, as evidenced in the fields of acupuncture and homoeopathy.

BIONIC INSTRUMENTS

# How can negative influences be positively changed?

## **Natural technology naturally sets standards: memon bionic instruments.**

After more than two decades of research, memon's innovative technology was developed by Winfried M. Dochow, an engineer and developer who was even then way ahead of his time. A serious illness made it perfectly clear to him just how serious the issue was. He subsequently worked together with the highly respected Boltzmann Institute and Joanneum Research, researching natural and artificial electromagnetic fields and their effects on humans.

## **In a healthy and vital body, every cell performs its function and should not be impaired in any way.**

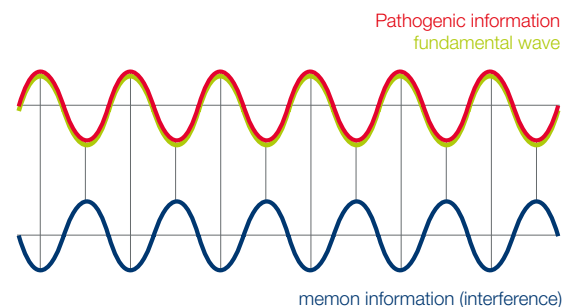

If cells are disrupted by pathogenic information, they send out the wrong signals. Under this kind of influence, cell function can be impaired or even destroyed completely. If biological control systems are in equilibrium, cell functions are protected and maintained.

## **Destructive interference. A physical principle of nature.**

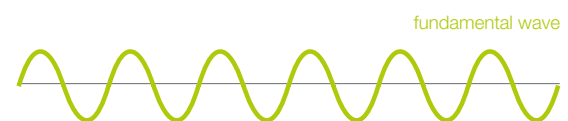

The memon technology is able to neutralize all pathogenic, or illness-causing, influences from electromagnetic fields.

As indicated by the illustrative model below, this is based on the natural principle of destructive interference. This occurs when two waves of the same wavelength, frequency, cycle or phase and amplitude collide and oscillate by  $180^\circ$  relative to each other. This principle is used in the cockpit of a plane, for example, to neutralize interfering sound waves so that the pilot is able to communicate clearly.

Graphic representation

The harmful information is neutralized, while the technical wave remains unaffected.

RENATURE YOUR LIFE

# Fine particulate matter.

## The smaller the dust, the greater the risk.

### Publications on fine particulate matter illustrate the tremendous risk it presents.

Fine particulate matter causes illness (WHO air quality guidelines for Europe 1996), shortens life expectancy (Peters et al. 2002, MIRA Study 2012) and can cause increases in sick days and illness in the work force (Hänninen and Knol 2011). Fine particulate dust can also damage the memories and brains of children (Suglia 2008, Brain and Cognition 68 2008), just to name a few examples.

Dust describes all the particles in the air that are so small, that they float around for a while and then eventually settle on the floor. Fine dust remains suspended in the air for long periods time and comprises of ultra-fine particles, mere micrometres in size, which can be inhaled and transported to the lungs. Especially critical are the ultra-fine particles that can penetrate the blood, organs and even the brain.

### Healthy indoor air is essential for our well-being.

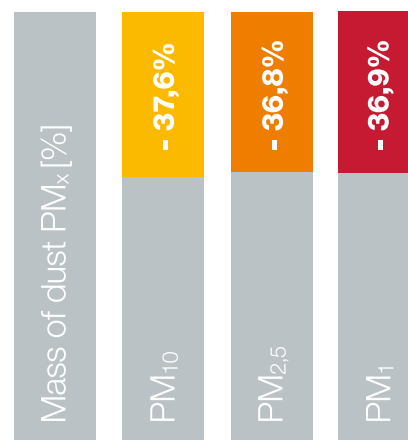

According to studies, Central Europeans spend 80 to 90% of their time indoors. In normal conditions, the ion ratio is general 3:1 or 2:1 in favor of positive ions. "Negative ion thieves", such as electrical fields generated by modern electronics, household appliances, and wireless networks, can have many consequences and prevents dust from settling on the floor. These range from a vague feeling of being unwell to chronic symptoms and illnesses.

### Memon can help reduce the amount of fine particulate dust indoors.

We inhale dust with every breath we take. This is reduced with help from memon, especially the fine dust particles that penetrate deep into the lungs. This memon technology achieves this by reducing the concentration of dust particles indoors by making them fall to the floor more quickly. Other positive effects include a reduction in airborne germs, odors and allergens. At home, at work, in the car and in any indoor environment.

### Sample measurement with and without memon at a pharmacy in Klagenfurt in 2012:

- Fewer particles < 10 µm that can get into the nose and throat
- Fewer particles < 2.5 µm that can get into the bronchia of the lungs
- Fewer particles < 1 µm that can penetrate deep into the lungs and the body

With memon, there is 37% less PM10, PM2.5 and PM1 particles of dust contamination in the air. More information at [www.memon.eu/en](http://www.memon.eu/en)

# Make phone calls without worrying. **memonizerMOBILE**

## **Why expose yourself to a risk when you can do something about it?**

You can make telephone calls that are free from pathogenic, i.e. illness-causing, subtle information. The memonizerMOBILE neutralizes negative information from electromagnetic fields. Biological control systems are able to remain in equilibrium even with the presence of interference fields.

## **Easy to use.**

For older types of mobile phones, the memonizerMOBILE can be simply placed inside the phone on top of the battery. For newer models, the memonizerMOBILE simply sticks to the back of your smartphone and is available in black, white and grey. The memonizerMOBILE is also designed to be used with tablets and laptops.

## **No cell phone without the memonizerMOBILE.**

## **Your benefits:**

Avoid the typical effects of mobile radiation, such as tension and stress.

Your vitality and well-being are preserved.

Protection against negative information from electromagnetic fields.

Relaxed and stress-free telephone calls.

**memon**<sup>®</sup>  
BIONIC INSTRUMENTS

# Mobility without stress from radiation. **memonizerCAR, memonizerE-CAR & memonizerCAR media**

## A car or a radiation trap?

In an average modern mid-size car, there are anywhere from 4,000 to 8,000 meters of cables, up to 60 microprocessors and countless little motors and transmitters built in. Your navigation system acquires its position using GPS, radio and telephone – which is all received via radio waves. A study commissioned by the Federal Office of Public Health in Bern showed that cars moving at 80 km/h generate magnetic fields between 1 and 6 microtesla in the passenger's foot area and on the back seat. Compare that to electrical appliances and power lines in households which generate magnetic fields between 0.005 and 0.1 microtesla.

The situation in hybrid and electric cars is even more alarming as the driver usually sits directly over the battery – right in the middle of an electromagnetic field. A study/test conducted by an electric car manufacturer showed as early as 2011 that memon technology can neutralize the negative influences in electric vehicles.

If the protection from electrosmog is important to you, then protect yourself with the memonizerCAR for normal vehicles, the memonizerE-CAR for electric vehicles or the memonizer-BUS in large vehicles.

## **NEW: The memonizerCAR media**

Modern technology is ever-increasing in new models, the new standard features being Bluetooth, WiFi, and sensors for measuring distances. The memonizerCAR media is recommended for these new features in order to neutralize these additional stress factors.

**No car without the memonizerCAR.  
No new model without the  
memonizerCAR & CAR media**

## Your benefits:

Protection against negative information from electromagnetic fields while driving.

# Create room for well-being. **memonizerCOMBI & WLAN**

## **The basis for indoor spaces.**

Neutralizes negative information from low and high-frequency electromagnetic fields as well as geopathic zones of interference and reduces fine particulate matter in the air.

With the memonizerCOMBI, you can ensure the ideal indoor climate and well-being for inhabitants of single and multiple-occupancy homes, apartments, offices, businesses, factories, shops, hospitals, nursing homes, hotels, restaurants and properties of all kind.

The memonizerCOMBI is available in four standard sizes depending on the total surface area and power consumption.

## **NEW: The memonizerWLAN**

The memonizerWLAN is recommended to be used in combination with the COMBI if WiFi technology is used. WiFi technology and routers has become increasingly stronger in recent years, which makes the additional protection necessary.

## **Easy to use.**

Simple to operate, fantastic effect. Experience a completely new indoor environment and increased state of well-being. Our consultation is free and without obligation.

## **No rooms without the memonizerCOMBI & WLAN**

## **Your benefits:**

Less stress for your body and mind.

Improve the quality of the air indoors by reducing the particulate matter in the air.

## Protection & support for your dog. **memonizerDOG & DOG steel**

Not only are we affected by these environmental stress factors, but our beloved pets are affected as well — probably more than we have previously realized.

Through the years, thousands of people have experienced the positive effects of memon in their homes and on their pets. Many of those also wanted to protect their dogs while outside of their memon-harmonized homes.

The memonizer DOG and memonizerDOG steel is the result of many years of intensive research that now makes it possible to help support and protect your dog from the negative effects of electrosmog while traveling or on the go. The feedback from various families during a one-year test period has confirmed the balancing effects on their dogs.

### **Easy to use.**

The memonizerDOG is kept close to the body with the help of the enclosed carabiner or Velcro strap, which can be easily attached to a collar or harness. The extremely light and robust material ensures that the memonizerDOG can be worn comfortably and without any disturbance to your pet.

### **No dog without the memonizerDOG or memonizerDOG steel.**

The memonizerDOG

The memonizerDOG steel is attached to the collar by means of the included Velcro strap.

**The best friend**  
for man's best friend.

# RENATURE YOUR LIFE

*“Our dachshund Max was the Beckham among dachshunds. Every day, many hours of playing ball and running were the highlight of his day. After 13 years, however, the hour-long activities became shorter and shorter. We thought that Max was simply getting older. We noticed a change in his energy and desire to play after wearing the memonizerDOG after only a short period of time, which continued to increase as more time went by. After that, Max was his old self again and no longer had trouble playing ball. Based on our experience, we recommend the memonizerDOG for every dog owner.”*

*“Food labels do not always show what is actually in our food. In this case, for example, food stuffs are generally deprived of vital substances that are needed by our minds and bodies. Instead, more chemicals are included that do not provide the necessary nutrition. The goal, in most cases, is to increase the shelf life of food stuffs in super markets.”*

Hans-Ulrich Grimm, Author of „Die Ernährungslüge“

## It is in our nature to protect ourselves against danger.

We are either unwilling or unable to do without the benefits of modern technology. Our dependence on this new technology is ever-increasing while our ability to “disconnect” slowly declines.

Our belief is that negative information from low and high-frequency magnetic fields generated by domestic appliances, computers, mobile phones or WI-FI networks, endanger our health just as much as toxins in water and the growing problem of particulate matter and other pollutants in the air we breathe.

Physical complaints such as sleep disorders, concentration problems, nervousness, headache, a weakened immune system and even cancer are also increasing. They are not only made worse by harmful substances, but also by the growing concentration of electromagnetic fields that can disrupt the natural biological processes in our cells.

Protection has never been so important. With memon, you can restore a natural balance in your immediate environment, effectively protecting yourself and your loved ones while continuing to use modern technology in all the positive and necessary ways you want.

The goal of this brochure was to inform you not only about the latest findings in the field of biophysics and about the memon philosophy, on which all the memon products are based, but also about the benefits you can gain from using them.

**Contact your nearest memon partner or memon directly.**

You can find our contact information on the back side of this brochure. We are happy to consult you free of charge and without obligation.

To say yes to a better quality of life and to say no to risks that put you in danger.

### **Confirmed cell biological effect.**

A study by the cell biologist Professor Dr. Dartsch has shown that the damaging effect of mobile phone radiation (far below published safety thresholds) on the vitality of human cells. These damages can be impressively neutralized by the use of the memonizerMOBILE.

RENATURE YOUR LIFE

*“Technology and nature are not mutually exclusive. On the contrary, the solution lies in using modern technology to create natural conditions. We need to learn to live in harmony with nature without exploiting it. That also means applying the knowledge we have and constantly expanding it. With the memon technology, we have successfully been able to correct the harmful effects of our environmental transgressions. For a developer, there can be nothing more fulfilling.”*

Winfried M. Dochow, Developer of memon Technology

#### **NEW: The memon WORLD**

Interactively explore the various applications of all the memonizers and find out how memon can be customized to fit your needs. Enjoy all the functions of the memon WORLD on your PC, MAC or tablet.
